

## COMMUNITY SCENARIO

2

40 MIN

### FRESH RECRUITS

The trenches of Rivet are a vast network. They are vital for moving fresh infantry reinforcements rapidly to the next assault. Sometimes the trenches are only a few metres apart; with rich pickings so close, it's hard to resist the opportunity to hinder the enemy before the real battle even begins.

#### Summary:

You are the leader of a small defence-squad assigned to ensure the safe arrival of new recruits to the front-line.

In this scenario, you have two objectives:

- Defend the Infantry Reinforcement Units [IRU] making their way across the board
- Prevent your opponent's [IRU] from making their way across the board.

Neither player may deploy Tanks during this mission; as resources are tight.

#### Special Rules:

No Secret Missions – HQ have not assigned secret missions to your defence-squad.

1 Infantry Reinforcement Unit (IRU) [Rifleman or Panzerfaust] is deployed at the start of each Deployment Phase. IRU are deployed into the neutral deployment zone at no deployment cost to the player.

At deployment each IRU have 2-health. This is because they are fresh and uninjured. Use damage markers to clearly identify IRU from other infantry.

Each IRU will move forward exactly 2 grids in a movement phase. The appropriate locations have been marked on the map below.

If it is not possible to move the IRU it will remain stationary and hold up the convoy!

2 IRU cannot occupy the same grid.

During the Combat phase an IRU can target any unit in range chosen by the player.

Beneficial Action cards cannot be used on IRU (such as "Stiff Upper Lip").

#### Resources:

3 Deployment Points

1 Rivet

#### Victory Conditions:

VPs are awarded every time an IRU leaves the board. The number of VPs awarded is equal to their health.

The first player to reach 10 VPs wins.
